EDUCATION

Amity University, Gwalior

2023 – 2027

Bachelor of Technology in Computer Science and Engineering

Gwalior, Madhya Pradesh

Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence, Database Management Systems (DBMS), Systems Programming, Software Methodology, Computer Architecture, Internet Technologies.

TECHNICAL SKILLS

Languages:	Python, Java, C, C++, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frameworks & Web:	React 19 / React.js, Next.js (App Router), Flask, Node.js, Express.js, Redux Toolkit, React Router v7, SQLAlchemy, Tailwind CSS v4, Recharts, PWA
Cybersecurity & SOC:	OWASP Top 10, Web Vulnerability Assessment, TCP Reconnaissance, Nmap, TLS/SSL Ciphers, CVSS v3.1, SIEM Alerting (Discord/Slack Webhooks), SSRF Mitigation, Security Headers
Authentication & Testing:	Google OAuth 2.0 (OpenID Connect), JWT, Bearer Token Auth, CORS Policies, Vitest, React Testing Library, Postman
Databases & Cloud:	PostgreSQL, MySQL, SQLite, Git, GitHub, Docker, Vercel Serverless, Render, Gunicorn, Linux / Bash

WORK EXPERIENCE

Oxella Technologies Pvt. Ltd. — Full Stack Developer Intern

7 July 2025 – 18 Aug 2025

Real User Monitoring (RUM) Engineering Team

Jaipur, Rajasthan

- Architected core backend and responsive frontend modules for an enterprise Real User Monitoring (RUM) platform using **React.js**, **Node.js**, **Express.js**, and **MySQL**.
- Implemented secure authentication and session control utilizing **Google OAuth 2.0** and **JWT-based authorization** for protected user and team workflows.
- Engineered secure, validated RESTful API endpoints for user onboarding, team creation, dynamic invitations, and hierarchical team listings with robust error handling.
- Built responsive client views with Axios API integrations; thoroughly tested API endpoints and session states using Postman.

FLAGSHIP PROJECT

VulnEye — Enterprise Web Vulnerability & SOC Intelligence Platform

[\[Live Demo\]](#) [\[GitHub\]](#)

Python 3.9+, Flask 3.x, SQLAlchemy, PostgreSQL, SSE, ApexCharts, ReportLab 4.x, OWASP, Vercel/Render

- Developed a commercial-grade web vulnerability scanner conducting automated non-intrusive perimeter audits across **13+ TCP ports (21–27017)**, SSL/TLS certificate chains, OWASP security headers (HSTS, CSP), dotfiles (`.env`, `.git`), and CORS policies with strict SSRF-safe subnet protection.
- Built a real-time telemetry streaming audit terminal using **Server-Sent Events (/scan/stream)** with HUD radar sweeps and Web Audio sound synthesizer feedback.
- Created an **AI Bilingual Threat Explainer** generating dual-language (English & Hindi) exploit walkthroughs and auto-synthesizing drop-in Nginx and Linux UFW hardening scripts.
- Integrated an Executive SOC Command Center with **ApexCharts** risk metrics, continuous 24/7 target watchlist, SIEM alerts via **Discord/Slack webhooks**, dynamic SVG grade badges, and **ReportLab 4.x** corporate PDF dossier exports.

FEATURED ENGINEERING PROJECTS

LaunchDesk — AI-Supercharged Customer Support SaaS Platform

[\[Live Demo\]](#) [\[GitHub\]](#)

Next.js (App Router), TypeScript, Tailwind CSS v4, Recharts, Lucide React, LocalStorage

- Architected a modern customer support SaaS frontend with **Next.js App Router** and strict TypeScript interfaces, featuring a unified support inbox with real-time filtering, priority assignment, and status management.
- Designed an **AI Copilot UI** for automated response drafting, intelligent customer ticket summaries, and internal team collaboration notes.
- Engineered an interactive analytics dashboard featuring resolution time metrics and SLA performance charts built with **Recharts**.
- Implemented seamless client-side state persistence using global **AppContext** and localStorage for zero-backend ticket CRUD, avatar customizations, and dark/light theming.

Aurora Store — Premium E-Commerce Capstone SPA

[\[Live Demo\]](#) [\[GitHub\]](#)

React 19, TypeScript, Redux Toolkit, React Router v7, Vite 8, Vitest, Tailwind CSS v4

- Built a high-fidelity e-commerce Single Page Application (SPA) leveraging **Redux Toolkit** (cart, auth, product, theme slices) for predictable state management with seamless localStorage session persistence.
- Implemented **React Router v7** navigation with <ProtectedRoute> wrappers securing Checkout and Admin Dashboard views behind mock JWT authentication.
- Engineered an interactive sliding cart drawer with real-time tax/shipping calculations, promo coupon validation (AURORA20), and a masked 16-digit credit card checkout flow.
- Created an Admin CRUD dashboard with inventory valuation analytics and low-stock alerts; verified core business math with **Vitest and React Testing Library** test suites.

AeroSky — Weather Dashboard & Intelligence PWA

[\[Live Demo\]](#) [\[GitHub\]](#)

Vanilla JavaScript (ES6+), HTML5, CSS3 Variables, PWA, Service Workers, Open-Meteo API

- Engineered an installable **Progressive Web App (PWA)** delivering offline resilience via Service Workers (sw.js) and Cache API for real-time weather analytics and Air Quality Index (AQI) grading.
- Rendered custom interactive **SVG sparkline temperature charts**, 7-day high/low range bars, and an animated SVG arc tracking the sun's position between sunrise and sunset.
- Integrated Open-Meteo and OpenStreetMap Nominatim APIs for location search and HTML5 geolocation with dynamic weather-responsive visual theming and instant °C / °F conversion.

LEADERSHIP & CAMPUS ROLES

Lead, Design and Marketing Team — Amity Coding Club (ACC)	March 2026 – Present
Coordinator, Design and Marketing Team — Amity Coding Club (ACC)	May 2025 – March 2026
Member, Design and Marketing Team — Amity Coding Club (ACC)	2024 – May 2025
Class Representative — B.Tech in Computer Science and Engineering, Amity University MP	2023 – Present

HONORS & ACHIEVEMENTS

2nd Position — MP Police Cyber Security Hackathon	February 2025
Awarded 2nd Place by the Madhya Pradesh Police Department in a state-level cybersecurity competition for rapid vulnerability detection, simulated offensive-defensive vector analysis, and architecting actionable defensive countermeasures against critical cyber threats.
